

A Month of Psalms for Daily Bible Reading

Posted on June 1, 2015 Posted By: admin Categories: Devos

There are 150 psalms in the book of Psalms. There are at least 30 days in a month (except February, of course). The Psalms are divided into five separate books. Read five psalms per day, skipping by 30, and you will read all the psalms in one month. Combine all of these facts and you get a clever way to read through the Psalms in one month. Scroll to the bottom to watch a video intro to the Psalms.

The following reading chart will make it so you don't have to do the math. I've used this reading plan many times, and it is a very rewarding experience. I encourage you to pray through the Psalms this month. If you skip a day, don't worry, just jump to the day of month in which you are reading. Each Psalm stands alone. Enjoy!
